

THERE ARE THINGS YOU REALLY SHOULD KNOW ABOUT WATER FLOW.

The new Electric Valve Controller from Elkhart Brass.

Now you can accurately monitor and control flow and pressure while getting an exact measure of valve position. And with the preset feature, just punch in the desired valve position and let the heavy-duty motor do the rest. Combine it with our new Unibody Valve, and you've got the ultimate water flow control. So, go electric and watch it flow. Just go to unibodyvalve.com or call us at 800-346-0250.
