

- ✓ Works well under pressure.
- ✓ Plays well with others.
- ✓ Listens well.
- ✓ Follows directions.
- ✓ Accepts responsibility.

THE UNIBODY VALVE

With the ease of pressing a button, the Unibody Valve Electric Controller from Elkhart Brass allows firefighters to set, monitor and control water flow and pressure from almost anywhere on the truck. Designed with precision in mind, the integrated digital display is easy to operate with programmable preset and intuitive calibration. With the Unibody Valve Electric Controller, Elkhart Brass has taken the guesswork out of water management. Visit www.unibodyvalve.com or call 800-346-0250 for more information.
