

- ✓ Works well under pressure.
- ✓ Plays well with others.
- ✓ Listens well.
- ✓ Follows directions.
- ✓ Accepts responsibility.

THE UNIBODY VALVE

Pick your valve. Then choose an actuator. Any size — it doesn't matter. In fact pick more than one actuator. The Unibody Valve was designed for unprecedented compatibility and versatility. The single-body design of the Unibody Valve makes configuration and installation a cake walk. And with bi-directional flow and no o-rings, service is a breeze. The cross-compatibility also makes switch-out fast and easy. Best of all it's made by Elkhart Brass so you know you're getting a quality product with a trusted history of firefighting behind it. Visit www.unibodyvalve.com or call 1-800-346-0250 for more information.
