

THE STINGER® RF. ALLOWS YOU TO BE HANDS-ON ... FROM A HANDS-OFF DISTANCE.

What do you call a monitor that allows hands-on control while being operated well out of harm's way? Smart!

A dual purpose break-apart monitor, the Stinger® RF can be used either as a deck gun or portable monitor. That's smart. It can also be operated remotely from 400 meters away, greatly reducing the risk of injury. Because the Stinger RF can be used on or off the truck in a variety of situations, it's also a smart buy.

The Stinger RF — one more example of why Elkhart Brass is the leader in integrated remote control equipment and other "smart" technology firefighting products.
