

# THE STINGER® RF.

## THE MONITOR WITH THE SPLIT PERSONALITY.

A dual purpose break-apart monitor, the Stinger® RF can be used either as a deck gun or portable monitor. That's more than smart. It's a great value. Because the Stinger RF can be used on or off the truck in a variety of situations, it provides greater cost efficiency than buying different monitors to serve different needs. It can also be operated remotely from 400 meters away, greatly reducing the potential risk for injury.

Referred to as the "ultimate in portable monitors" by firefighters worldwide, the Stinger RF is just one of six RF monitors in the Elkhart Brass line. It's one more reason why Elkhart Brass is the trusted leader in integrated remote control firefighting products.
