

HOW DID WE MANAGE TO DESIGN A BETTER VALVE?

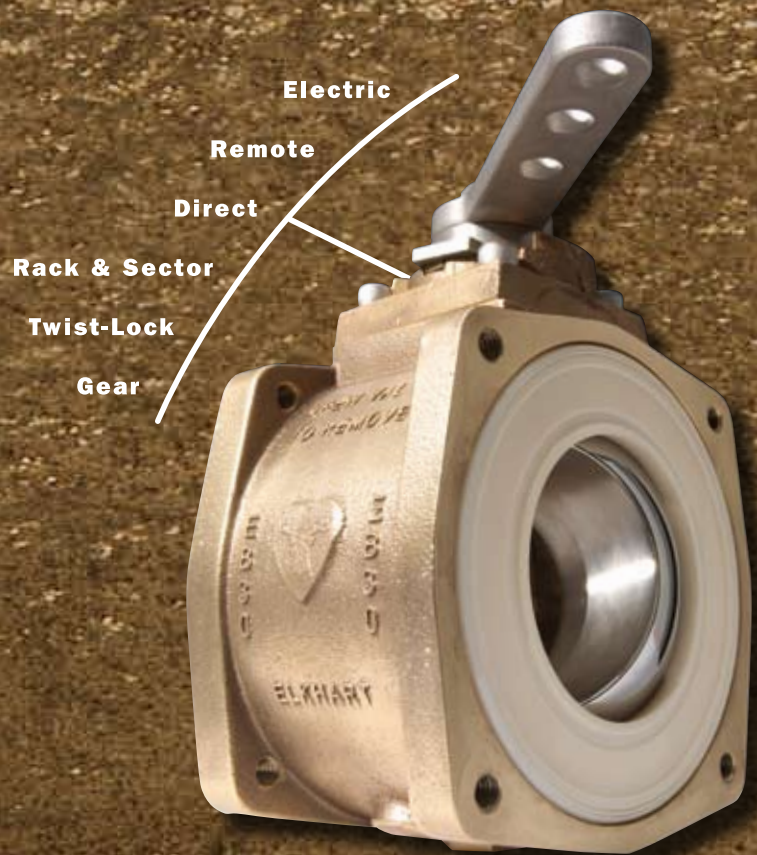

Elkhart Brass
Fire Fighting Equipment

SIMPLE.

Introducing the new Unibody Valve from Elkhart Brass. It's the only valve in the industry completely engineered and designed with easy, trouble-free configuration, installation, operation, and service in mind. Just choose your valve, and then select your actuator. Simple enough for you?

SIMPLY BRILLIANT.

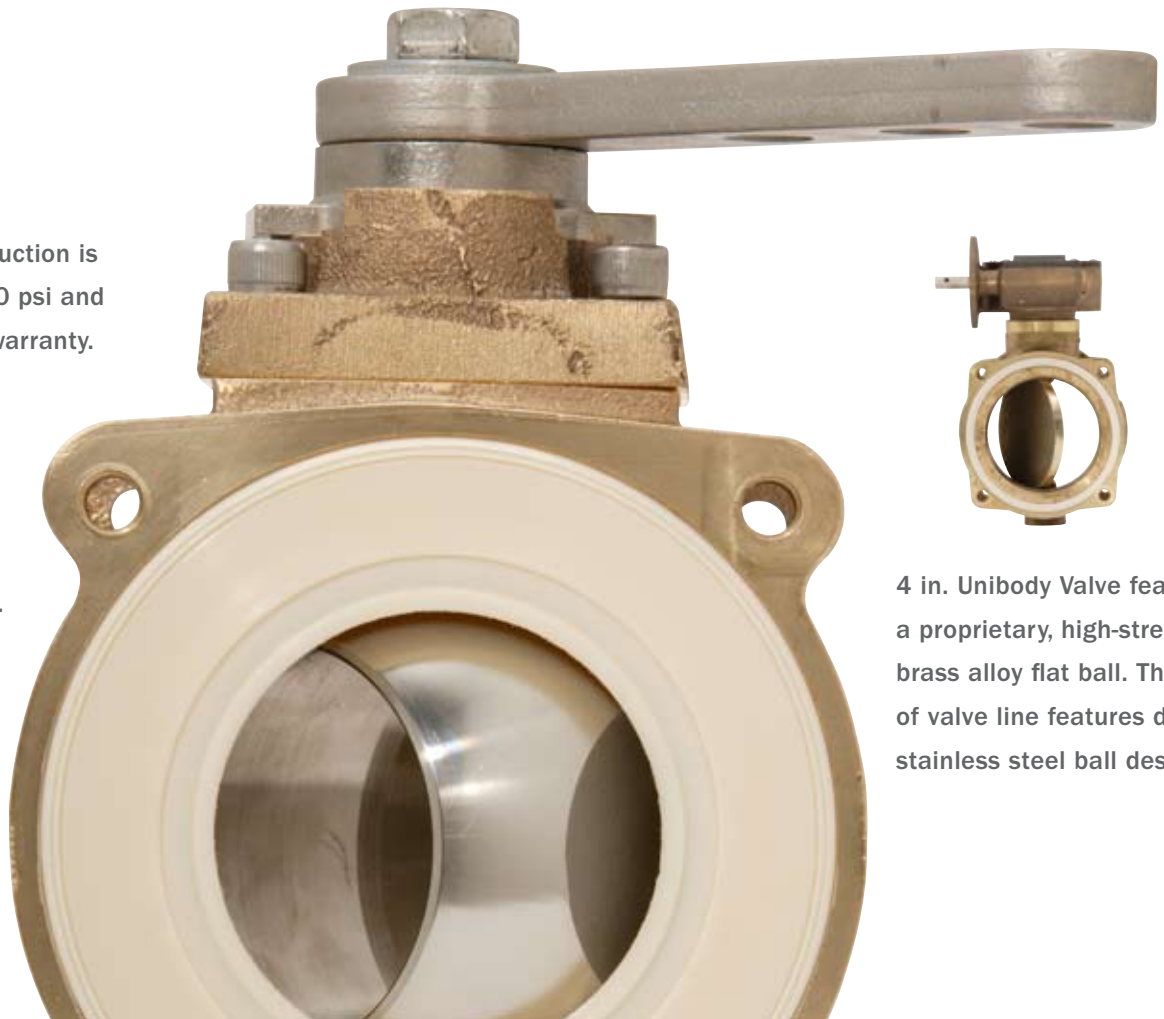

A valve designed to make your job easier. Well, it's genius. With just four bolts you can change the actuator on any Unibody Valve. And with no gaskets or O-rings, dual self-adjusting seats, a stainless steel ball, and a bolt-on slow close, you can be confident you're getting the best performing valve on the market.

SERVICE IS A SNAP.

Servicing a valve has never been as simple. Swing-out body, bi-directional water flow, and cross-compatibility all aid in making maintenance a breeze. Add in 8 handle positions with removal of a single bolt and you've got a valve like no other. It's that simple.

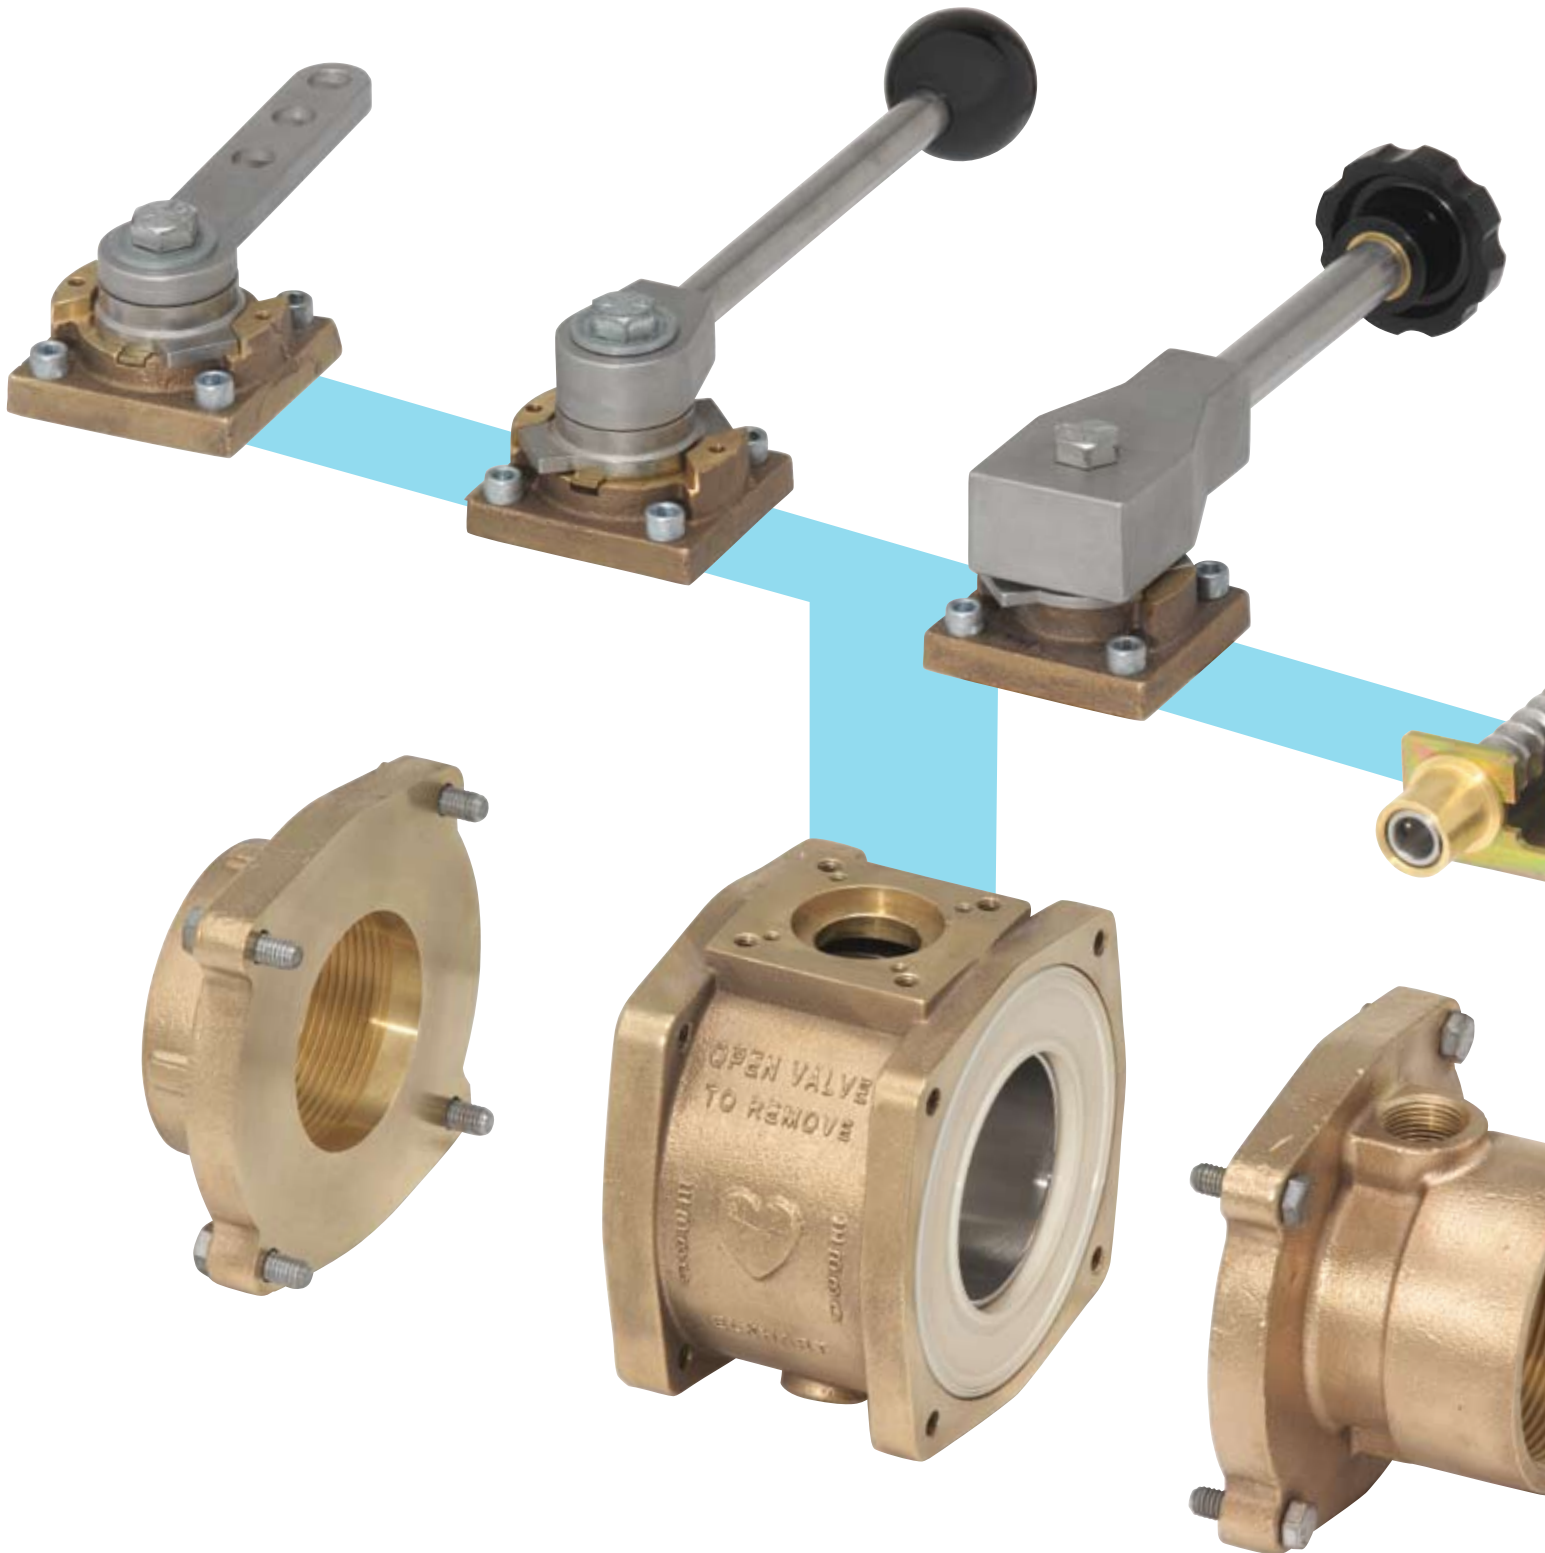

Extra strength construction is pressure rated to 250 psi and comes with a 10 yr warranty.

Dual seats provide bi-directional sealing. Flow optimization reduces turbulence.

4 in. Unibody Valve features a proprietary, high-strength brass alloy flat ball. The rest of valve line features durable stainless steel ball design.

Unibody Valve™ By Elkhart Brass

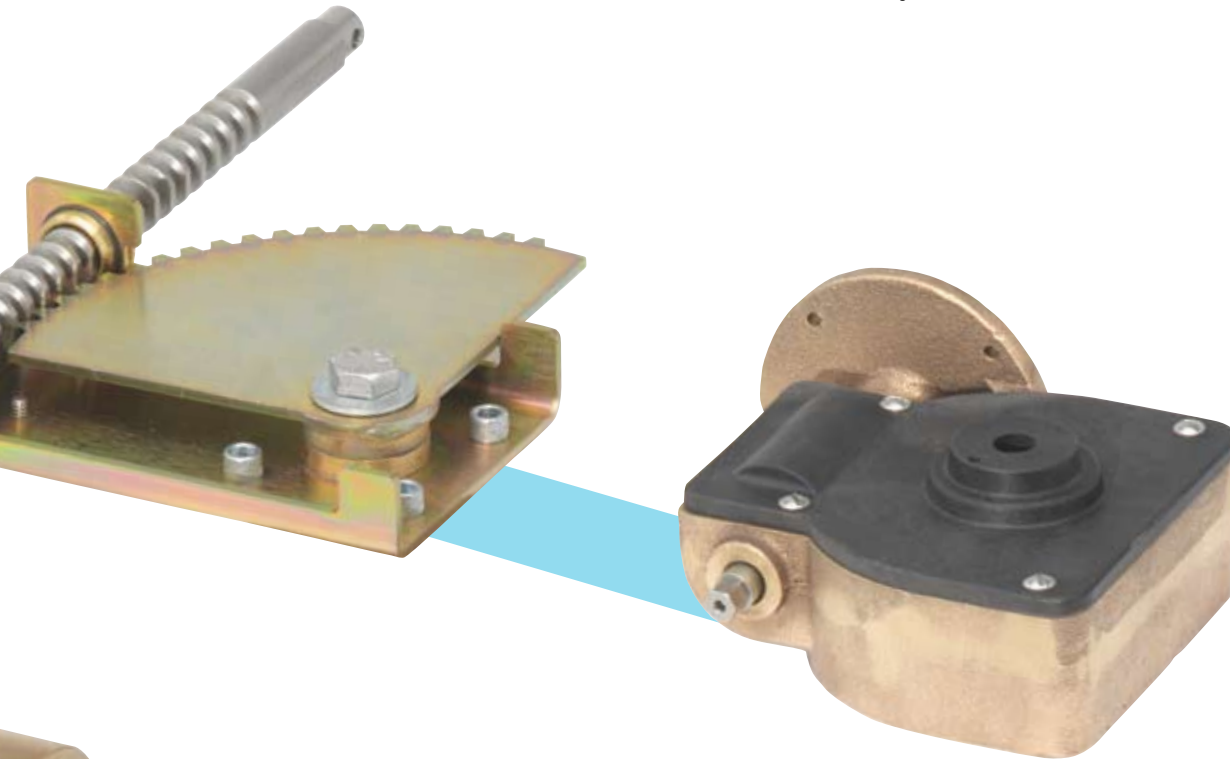

ONE VALVE FITS ALL.

Want to switch out a push-pull for a gear?
A twist lock for an electric? No problem.
The Unibody Valve allows for trouble-free
actuator change-outs without having to
break the waterway.

CAP IT OFF.

Don't forget the adapters. You won't
with over 200 to choose from. Whether
it's a time-saving pump flange adapter
or a weldable stainless endcap, you've
now got more plumbing options than
anywhere else in the industry.

EASY PICKIN'S.

It's as simple as 1, 2, Or 6
for that matter. Just pick
the size you need and
you've selected your valve.

Unibody Valve #	Size	Length
EB15	1.5"	3"
EB20	2"	3"
EB25	2.5"	3.5"
EB30	3"	4"
EB35	3.5"	4"
EB40	4"	4"

GO ELECTRIC.

Get complete control at your fingertips. Designed with precision in mind, the new electric valve controller provides the most comprehensive actuator operation. Integrated electronic display is easy to operate with programmable preset and intuitive calibration.

Thoroughly monitor and control both flow & pressure while visually tracking valve position with digital readouts and 10 LED valve position indicator. Combined with our extra strong electric motor you've got the ultimate control. Simply push and watch it go.
