

WHAT'S NEW?

NEW PRODUCT INTRODUCTIONS

ELKHART BRASS

SPRING 2009

COVERS ALL THE ANGLES

New Oscillating RAN™ can be retrofit to any Elkhart RAM®

Lightweight and compact, Elkhart's new, water-powered Oscillating RAN (Rapid Attack Nozzle) has an adjustable sweep range plus a quick disengage

mechanism for manual control. Best of all, the new Oscillating RAN can be installed as a retrofit to any RAM (Rapid Attack Monitor) in minutes.

THE SMART WAY TO TAKE CONTROL.

Intelligent CAF Selector

Nothing beats being in control. Total control. That's why Elkhart is so excited to present the revolutionary new Intelligent CAF Selector (ICS) for Unibody electric valves and Waterous compressed air foam systems. Developed in partnership with Waterous Worldwide, the ICS provides:

- A single control point for the CAF discharge
- Precise control of water valve and air valve
- Clearly marked button for toggling between three user selectable air-foam solution ratios
- CAF production is simple without sacrificing flexibility to produce the right foam at each discharge

WE'LL CATCH YOUR DRIFT.

No drift with our new Hydro-Loc® Unibody.

Drift is a drag. Drift is more than a drag — it's a real problem. A drifting valve will keep a truck from passing its UL test and put firefighters in real danger. So we engineered a more stable solution. The new Hydro-Loc Unibody. It won't drift. It can be ordered new or retrofit (four bolt change out) to an existing Unibody valve. Competitive valves can be easily replaced with the Elkhart Hydro-Loc Unibody (if you catch our drift).

Sidewinder® EXM

500GPM. Rugged and sealed reliability. Fast and easy programming. Quick and convenient configuration.

Just a few of the ways Elkhart has a simply better solution.

SIMPLY ... BETTER.

The Sidewinder EXM is built to withstand a ton of abuse. The electronics remain secure and sealed to complete submersion. Sort of like a Humvee®.

Think of the Sidewinder EXM as the Swiss Army Knife of monitors. It offers the right option for simplified wiring every time: traditional hardwire, RF point-to-point, RF network and CAN-bus. They're all available in the same unit.

Everything is configurable (and easy to configure). Voltage, stops, stow and more can be programmed straight from an everyday USB drive.

**FORGED
DURABILITY**

Elkhart's B-100A Wye takes performance under duress to the next level.

In the field, no equipment takes more abuse than wyes. So Elkhart now forges the standard long handles of its B-100A Wyes out of rugged 6061-T6 alloy to take the toughest treatment the firefighting team can dish out and deliver the industry's highest level of durability.
